

**BREAKING**

# WAAV Sprayer Kills Over 99% of COVID-19 Virus (SARS-CoV-2) in 10 Seconds

New WAAV Sprayer converts *just* tap water into 1,200 bottles-worth of all-natural Coronavirus-Killing Sanitizer & Disinfectant for use in Home, Office, School, Restaurant, Exercise Facilities, and more.

| December 23, 2020

**CLEVELAND, OH** - Zero Many, the “Zero Waste, Many Use” eco-focused consumer products division of global manufacturer, Dreison International announced today the Patented Blue Diamond Electrolysis Technology used in their WAAV Sprayer generates germ-killing Ozone Water that kills over 99% of SARS-CoV-2, the virus that causes COVID-19 in 10 seconds, or less. This breakthrough technology produces all-natural Ozone Water from ordinary tap water, right in the palm of your hand, with no toxic chemicals.

Testing that proved the patented technology is effective at killing over 99% of SARS-CoV-2, the Virus that causes COVID-19 was conducted by Fujita Health University in Toyoake, Aichi, Japan. Japanese distribution partners, The Tamura TECO Co, Ltd. provided the funding and equipment for the research. Tamura TECO distributes the “L Clean Minnie” in Japan, which contains the same patented Blue Diamond Technology as WAAV, which is covered by 32 international patents and is limited to select distributors worldwide.

Ozone Water, produced by WAAV is a long-established disinfectant used to kill 99.99% of some of the hardest to kill viruses, including Salmonella, E. coli, Staph, C. diff, C. albicans (cause of thrush), E. faecium (cause of meningitis), and P. aeruginosa, faster than many of the leading disinfectants on the market. It’s recognized by the FDA, EPA - and is compliant with the USDA Organic Program as a permitted ingredient in, and on, organic food and contact surfaces. Despite being 300x stronger and 20x faster than bleach, it’s friendly for use around children & pets - and you can even spray it on food.

Over its lifetime, the rechargeable WAAV Sprayer creates the equivalent of 1,200 bottles of multi-purpose cleaner that disinfects & sanitizes with NO toxic chemicals - for less than 1/20th the cost of traditional chemicals. It contains NO added chemicals, dyes, or fragrances - and leaves NO residue.

## About Zero Many, Dreison International and Become Known

The WAAV Brand is a product of Zero Many, a joint venture between Dreison International and sister company, Become Known. Dreison International and Become Known are Cleveland-headquartered, privately held companies that collectively employ over 700 people. Dreison owns & operates manufacturing plants in Ohio, Texas, Mexico, Switzerland, Turkey and China.

Since inception over 40 years ago, Dreison International’s manufacturing companies have specialized in the design and manufacturing of proprietary products for both original equipment and aftermarket customers. Market focuses include medical, military, agriculture, heavy-duty truck, off-road equipment, mining, industrial, construction equipment - and the power sports industries.

Zero Many operates with a vigilant focus on innovation in the direct-to-consumer product manufacturing areas of medical & non-medical related, zero-waste, sanitization, and eco-friendly solutions. The name - *is the mission*.
